Aqua Di Mare

Aqua Di Mare is a mixture of minerals for use in spas and swimming pools. Aqua Di Mare can be compared to the thermal tradition of the ancient Romans or the therapeutic properties of the Dead Sea, which have a positive effect on the skin.

Usage instruction:

use one litre of Aqua Di Mare for 1000 litres of spa water.

Keep out of the reach of children.

Instructions for Aqua Excellent with NEW spa.

Ensure your (new or used) spa to always be clean. In order to do so, use Aqua Excellent Spacleaner.

Procedure with NEW spa: to prevent test water from a new spa contaminating the water, clean the spa before use as detailed below:

- Fill the spa with tap water.
- Add 0.5 liter of Aqua Excellent Spacleaner to the spa's water.
- Make sure all jet nozzles are open and switch the pumps on at the highest level for 15 minutes.
- Leave the water in the spa overnight.
- Repeat step c.
- Let the water drain and flush with clean tap water. Let this last water drain as well.
- Fill the spa with clean tap water and re-install the cleaned or a new filter.
- Make sure the pH value always ranges between 7.2 and 7.4.
- Apply the chlorine dosage unit with the chlorine tab on the filter unit and heat your spa to the temperature requested (38 °C).
- Start treating the water with Aqua Excellent All-in-One as specified in the respective instructions.
- The night before refilling is scheduled (each 3 months), start the procedure with step a.

Tip: check you spa water's pH value every 3 weeks.

Instructions for Aqua Excellent with USED spas.

Ensure your (new or used) spa to always be clean. In order to do so, use Aqua Excellent Spacleaner.

Procedure with USED spas:

- Add 0.5 liter of Aqua Excellent Spacleaner to the spa's water the night before you plan to refill it.
- Make sure all jet nozzles are open and switch the pumps on at the highest level for 15 minutes.
- Leave the water in the spa overnight.
- Repeat step b.
- Let the water drain and flush with clean tap water. Let this last water drain as well.
- Remove the filter and clean it with Aqua Excellent Filtercleaner*.
- Fill the spa with clean tap water and re-install the cleaned or a new filter.
- Make sure the pH value always ranges between 7.2 and 7.4.
- Apply the chlorine dosage unit with the chlorine tab on the filter unit and heat your spa to the temperature requested (38 °C).
- Start treating the water with Aqua Excellent All-in-One as specified in the respective instructions.
- The night before refilling is scheduled (each 3 months), start the procedure with step a.

Tip: check you spa water's pH value every 3 weeks.

* Instructions for the Filtercleaner:

- Sprinkle 2 scoops of Aqua Excellent Filtercleaner over the filter.
- Place the filter into a bucket.
- Fill the bucket with hot water.
- Leave the filter in there for 1 to 1.5 hours to soak (turn filter around every once in a while).
- Rinse the filter with a water jet and re-install it with the spa.

Spa Cleaner

The spa cleaner is specially designed to clean the air chambers and your entire spa. Cleans water pipes of limescale and contaminating residues. Use spa cleaners every time you change the water. We recommend a quarterly replacement of your pool water.

1. Add 250ml of Spa Cleanser to the water 24 hours before you want to change it.
2. Make sure all air jets and valves are open. Then turn on the pumps for a maximum of 15 minutes. Repeat three times.
3. Remove the filter before letting the water run out.
4. Clean the filter with Aqua Excellent filter cleaner.
5. Wash your spa with fresh water.
6. Fill your spa with fresh municipal water and reinsert the clean filter.

Keep cleaning your spa pool with Aqua Excellent Water Care.

Keep out of reach of children.
